

Star Wars Lightsabers

Let's have fun making lightsabers!

Tube Lightsaber

- paper towel tube
- plain paper
- tape
- heavy card stock or construction paper

Decorate a plain piece of paper to resemble the control base of your lightsaber. Tape it to the paper towel tube. Take a piece of heavy card stock or construction paper and roll it up. Insert and tape it to the paper towel tube.

Noodle Lightsaber

- pool noodle
- silver duct tape
- black electrical tape
- knife

Have an adult cut your pool noodle in half with a knife. Starting from the bottom of the noodle, wrap silver duct tape to cover a quarter of the noodle. Wrap three rings of black electrical tape around the top of the silver duct tape. Take two pieces of black tape and stick them to the bottom of the noodle.

Children benefit from spending time together making crafts. Use items that you already have around the house. Let your child take the lead to promote creativity, thinking, and planning skills. Art projects offer many ways for children to build their small muscles and improve their fine motor development. Encourage your child's effort. Have fun creating lasting memories!
